

The 2-up vertical wall-mounted bike rail is ideal for areas where floor space is limited, allowing two bikes to be efficiently hung from their front wheels.

The bike rack uses a single rubber-coated pin, a more convenient solution than the cradle design which can interfere with the wheel mudguards.

The product is designed to meet AS2890.3-2015 Class B & C and is easier and faster to install than the single-up bike rack.

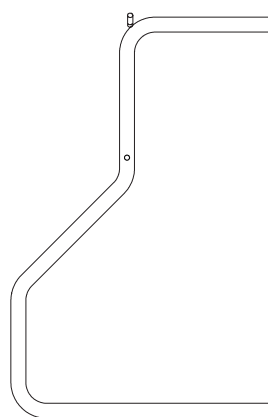

The system is best suited to garage and end of trip basement settings, where wall space is available that can support the weight of the secured bicycles.

### Product features

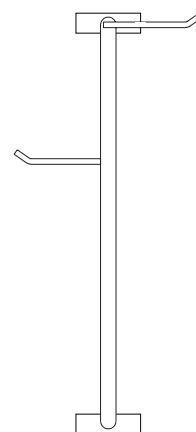

- Capacity to park 2 bikes per rail
- Easier and faster to install than the Single-up
- Conforms to AS2890.3-2015 Class B & C security
- Heavy duty construction
- Anti-theft shear nuts
- Plastic sleeve on hanging pins for wheel protection
- No damage to tyre mud guards and spokes
- Wall mounted or optional stand-alone mounting post
- Unique registered design (IP protected)

### Technical Details

Fixing Options	Wall mounted (as standard) Optional stand-alone mounting post (on request)
Material	Steel
Finish	Matt black
Dimensions (approx)	900mm height 400mm width 600mm depth
Construction	33.4mm O.D. pipe x 2.5mm wall 12mm thick pins
