

The Cyclo 2-up Vertical Stand Single is an efficient solution for safe and secure bicycle parking ideal for areas where floor space is limited.

The bike rack uses rubber-coated pins which allow two bikes to hang easily by the front wheel. This is a more convenient solution than a cradle design which can interfere with wheel mudguards.

The product conforms to AS2980.3-2015 Class B & C. The rack comes flat packed with the pole separate for on-site bolt together assemble.

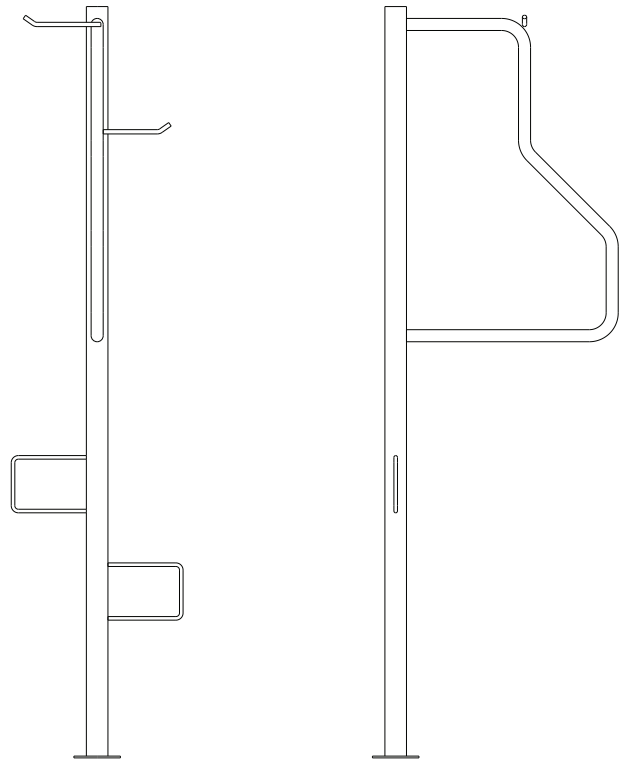

Available in a range of high grade finishes, the 2-up Vertical Stand Single-sided is ideal for end of trip facilities and public spaces.

Product features

- Capacity to park 2 bikes per rail
