ADD A SPLASH
OF **LIFE** TO YOUR
ENVIRONMENT

▼ Solutions for Life

Enabling healthy lifestyles is at the heart of everything we do.

An Australian owned family company we design and manufacture a range of products from our Australian-based facilities. The best-known product is our much-loved Aquafil range of smart hydration solutions.

Encouraging the use of reusable bottles reduces dehydration, dependence on sugary drinks, helps fight obesity, and reduces waste. It helps create a better planet for current and future generations.

▼ Water & Space

Safe, healthy, and invigorating experiences create happy communities, in which people truly love where they live, learn, work and play.

Well-planned, designed, and managed public space includes access to fresh and clean drinking water.

Enhanced public spaces encourage healthy lifestyles – the essence of a happy community.

▼ Water & Art

Our range of water stations has been designed, not just to dispense high quality drinking water. They also provide a platform for communication through art.

The powerful collaboration of water and art in a public space makes it more welcoming, happier and healthier.

Schools share messages of sustainability, learning and encouragement.

Councils often choose to share messages of happiness, safety, and healthy lifestyles.

What message will you share to your community?

We take environments that inspire...
and create solutions that enhance.

▼ Three ways to add a splash of life with art...

Template Based Design

Use the free templates to create water station art, perfectly suited to your community, message or mission. Working with a template design is quick and easy. Choose colours, add your own logo and text to make it uniquely yours.

PROCESS:

THEME: Choose your preferred design

COLOURS: Select colour scheme option

SUPPLY: Supply your logo and text

APPROVE: Review and approve design

PRINT: Design is sent to print and applied to your drinking water station

COST: Free art option

EXTRA: \$120 per hour for design amends outside of the scope

Authentic Aboriginal Art

Celebrate Aboriginal Art in your community by selecting from Civiq's Aboriginal Art collaboration with Luke Penrith; 'Connections and Journeys'

PROCESS:

THEME: Choose one or more of your preferred design options

APPROVE: Review and approve design layout for your station

PRINT: Design is sent to print and applied to your drinking water station

COST: \$350 per design

EXTRA: \$120 per hour for design amends outside of the scope

Supply Your Own Design

Work with your own design team to create your own customised art. You will receive a guide and dielines to ensure your designer creates the art to the correct size and specifications.

PROCESS:

DIELINE: Download blank template for your chosen water station

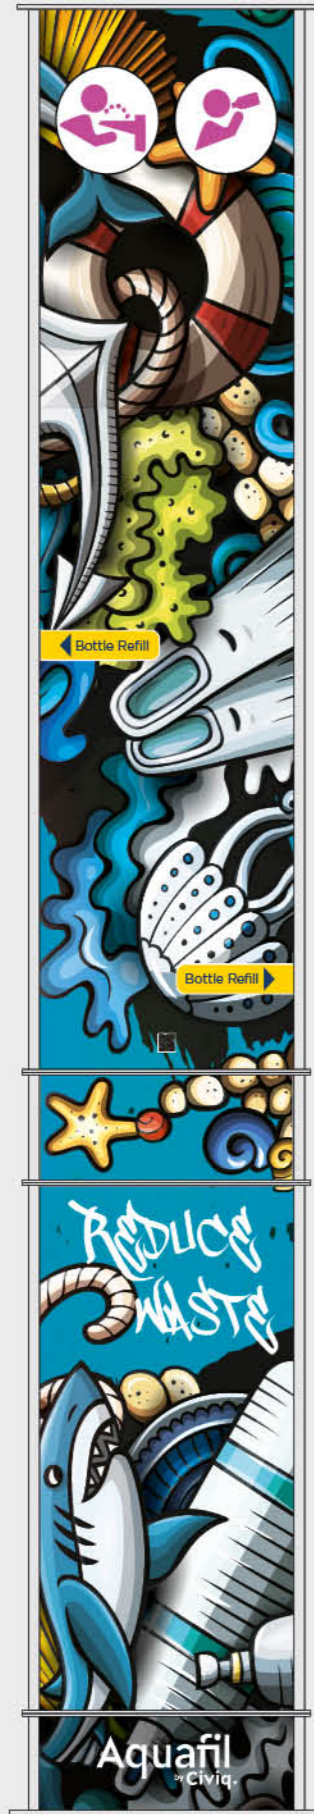

SUPPLY: Share the finished art with Civiq

CHECK: Civiq checks the art to ensure it meets print and size specifications

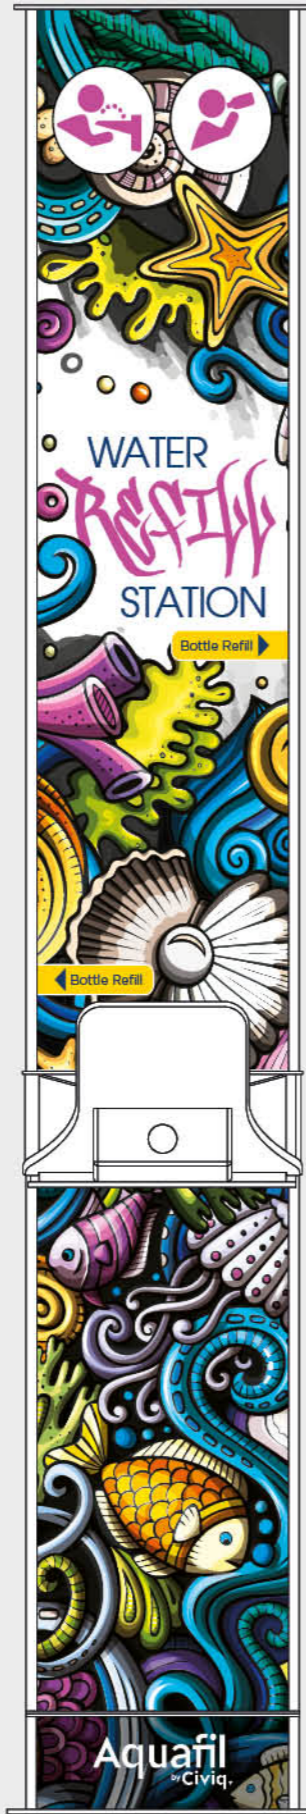

PRINT: Design is sent to print and applied to your drinking water station

COST: Free art option

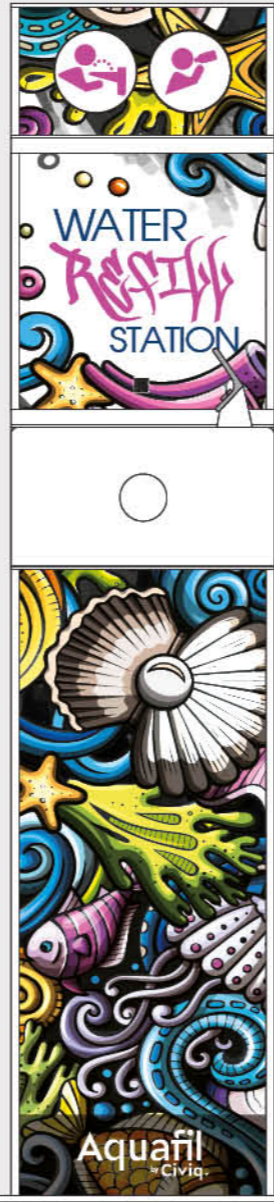

EXTRA: \$120 per hour for design amends outside of the scope

▼ Authentic Aboriginal Art

Celebrate Aboriginal Art and Culture in your community.

A visual feast for the eyes that invokes learning through stories and conversations.

Adding Aboriginal art to your drinking fountain will turn your water station into a talking point and educational opportunity.

Wiradjuri Artist Luke Penrith created the collection "Connections and Journeys" exclusively for Civiq and their customers.

▼ Hills and Valleys (Green Colours)

Which way is up for Aboriginal Art?

Luke created art that is an aerial depiction of the land. There is no 'right' or 'wrong' way to hold a map.

This means that you can hang Luke's Aboriginal art any way you like! The art you select will be equally suitable for a rectangular FlexiFountain as it is for the landscape splash back of the Hydrobank.

▼ Plains & Fresh Water (Earth colours)

This artwork represents Fresh Water people, of inland communities. It shows their special bonds with the rivers, creeks, swamps, and finally, water holes.

FlexiFountain 2100BF

Senior Pulse 1400BF

▼ Saltwater & The Coastline (Blue Colours)

The blue coloured artwork is about Salt Water people. These are people living along the coastline and their waterways.

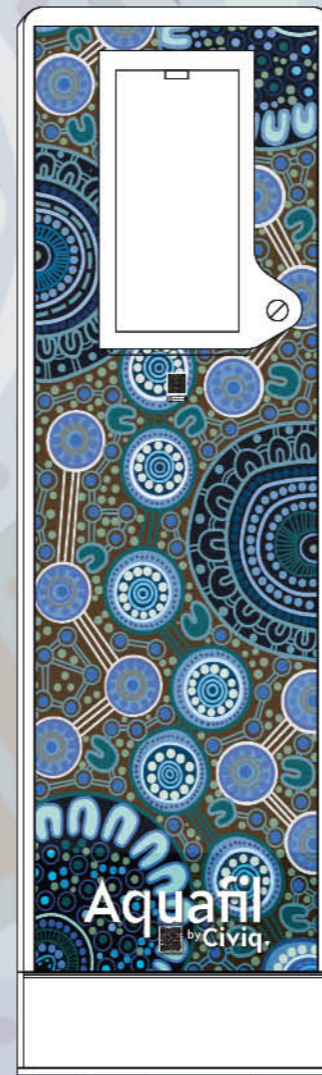

For Millenia, First Nations people have camped and sung along the coastline. They gather near food, fish, turtles, birds, and plants. This painting tells the story of their journeys up and down the coast.

“For First Nations communities, water is Sacred. It was a no brainer to partner with Aquafil by Civiq!”

- Luke Penrith, Wiradjuri Artist

▼ Switch It Up

How to replace artwork.

Changing the look of your water station is easy. The graphic panels can be removed and replaced using suction cups.

Your new graphic is applied to a metal sheet that is secured into the housing of the unit. It is the same quality and made of the same material as the original panel – but with a fresh look to match your current brand message of chosen imagery.

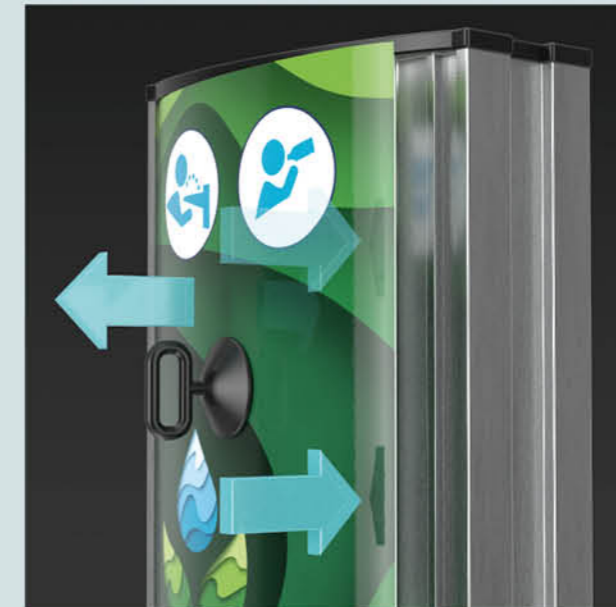

This offers you a fantastic opportunity to change the look of your water station, promote an event, share a new message or simply change over branding details.

Contact sales@civiq.com.au or 1300 600 300 to discuss replacing your artwork panels.

REMOVE PANEL:

Apply suction cups vertically along the center of the panel, top to bottom. Pull to remove.

REPLACE PANEL:

Slide and push panel into either side edge of the housing.

Apply the suction cups to the panel. Pull the suction cups towards you, keeping the panel in the housing. Push the bottom of other side of the panel into the housing.

Work your way up the panel, pulling the suction cup, and pushing the panel in.

Then, simply flex the top corner into place.

Smart. Sure. Pure.

Process of Engagement

Depending on the scope of your project we use our industry expertise to provide recommendations and outcomes that meet your specific needs.

Face-to-face site visits, or phone, and video consultations can be arranged to ensure the best outcome for you, your partners, and your community.
